

Home Environment Project

The Home Environment project allows young people to learn the principles of design as they explore different design elements for a variety of indoor rooms and outdoor spaces.

From choosing color schemes, accessories, décor, and more, Home Environment allows you to be the interior designer while you style a room or outdoor space by painting, choosing new floor covering, refurbishing furniture, updating accessories, and more!

Inspire Kids to Do

Explore

"I might like to do this."

Youth who explore a variety of interests before high school, through experiences like 4-H camps and educational events, can develop early interest in a career path and improve their academic performance.

Learn

"I can do this."

4-H project-based learning, guided by adult volunteers, improves youth understanding of skills and concepts, as well as their ability to problem-solve and collaborate.

Practice

"I'm interested in this."

Youth who have participated in sustained hands-on learning and engaged with professional mentors and volunteers before entering high school are more likely to explore studies and potential career paths.

Experience

"I will be this."

Real-world application is key — 91% of Kansas 4-H members have a plan for reaching their goals. Youth that have been active participants in hands-on learning, combined with strong decision-making skills, are more able to effectively navigate life.

Starting Out *Beginner*

- Learn and define the language, including design elements and principles.
- Plan and design your own space using new design techniques.
- Select budget and consider costs when designing your space.
- Practice selecting different furnishings to create different looks.

Learning More *Intermediate*

- Explore furniture styles.
- Create design boards to visualize living space changes and plans.
- Consider needs, wants, and timelines to make decisions.
- Learn proper care techniques for different elements, including furniture, flooring, etc.
- Coordinate fabrics and patterns for your space.

Expanding Horizons *Advanced*

- Select accessories to highlight features in your space.
- Consider lighting choices for your space.
- Use natural resources effectively.
- Be knowledgeable about energy efficient products.
- Implement place to Reduce, Reuse, Recycle, Rethink in your space.

Home Environment Project

Expand Your Experiences!

Healthy Living

- Learn about the process of decluttering to minimize stress in lives.
- Donate unused furnishings to local charities.
- Explore how colors and textures affect moods.

Science and Agriculture

- Experiment with durability, stain-resistance, or color-fastness of a material for spaces.
- Study energy efficiency and its importance to the environment.
- Create a floor plan to scale.

Community Vitality

- Coordinate a furnishing swap in your community to minimize costs on updating spaces.
- Assist with renewing community spaces, such as parks, to create an inviting and safe environment for community members.
- Organize or help with a recycling program in your community.

Communication and the Arts

- Create a tutorial video on how to refinish a piece of furniture.
- Demonstrate how to select a color scheme using the color wheel.
- Teach others the proper disposal methods for refinishing materials, including paint.

Career Development

- Explore careers through job shadowing and researching, including interior design, landscape architecture, professional organization, community and regional planning, marketing, publishing and advertising.
- Learn more about Kansas State University's various degree programs including from the Department of Interior Design and Fashion Studies, and the Department of Landscape Architecture and Regional and Community Planning.
